

# CW1-1-1: Basic Html & Css

## 1. Create an html page. On this page, we want the following statements to be written with your own information:

In the name of God (h1)

My name is ali, I'm 24 years old. (h3)

I am trying to become frontend developer (paragraph)

It's very amazing to create some new webpage from some codes without any UI system (paragraph)

In programming practice and try to code is a key to become a success developer (paragraph)

I am trying to become frontend developer (paragraph)

It's very amazing to create some new webpage from some codes without any UI system (paragraph)

In programming practice and try to code is a key to become a success developer (paragraph)

**.PONT**

**Using css: write the necessary resets for this page**

**change all the H1 on the page to the color (252,186,3)**

**the H1 font on the page should be 24 pixels**

**the H3 font on the page should be 20 pixels**

**the paragraph's font on the page 16 pixels**

**all the paragraphs on the page should be in dark gray color**
